Owen - per your hold notice this morning, here is the whole thread with Trevor. I haven't deleted anything. There were also two live conversations with him (10/30 and 12/9) that aren't written down anywhere, happy to walk you through them. Let me know if you need the Q1 headcount sheet too.

Subject: RE: DS team restructure - Q1 headcount

Thanks for yesterday. Friday 10am is confirmed with Marisol, she'll have the letter and the final check ready. Kevin is ready to pick up Ledgerline on top of Atlas from Monday the 13th, and I'd like to post the ML Ops req the same week so we don't lose the HC in the Q1 plan. I'll send the JD tomorrow.

Invite sent for 2pm tomorrow, Owen will dial in. Owen's words: the letter talks about the PIP and nothing else. Do not mention headcount, the ML Ops req or Atlas staffing to her or to anyone on the team until this is done.

Final PIP review done this morning. Not met on 1, 2 and 4 - LDG-418 never landed, no Atlas pipeline in staging, code reviews still averaging 3+ days. Objective 3 she did. Marisol has my write-up and the repo numbers.

Can we get Owen on a decision call tomorrow? I'd like Friday to be her last day so it's clean before the Q1 kickoff on the 14th.

Investigation closed Friday as unsubstantiated. Proceed per the PIP timeline, nothing more, nothing less. And pls stop putting the reorg stuff in email - talk to me live. I'm keeping the ML Ops HC in the Q1 plan as a placeholder for now.

FYI Q1 HC plan submitted to finance. I put the ML Ops engineer in as net new for now with a note "funding TBD - see DS restructure" so they will probably ask you about it. Daniela stays on the Ledgerline line until we know where the PIP lands.

PIP delivered at 10. Marisol sat in. She didnt take it well - said straight out its payback for the HR complaint and that shes "not signing anything." She wrote that in the comments box. 60 days takes us to Jan 3.

Marisol wanted the 9/12 line out, I left it in, it's accurate.

Trevor - talked to Marisol today. We are not eliminating or restructuring Daniela's role right now, full stop. There is an open HR matter and anything that touches her role, comp or duties has to go through Marisol and Owen first. If there are real performance gaps, document them properly and Marisol will review a PIP before it goes anywhere.

Please don't forward this thread.

Fair. For the record the restructure has nothing to do with the HR thing - I've been thinking about the team shape since Q3, the Atlas roadmap just makes it obvious now.

If we can't do the role change then it's a performance conversation anyway. Her Ledgerline output has been slow for months and she's dragged her feet on Atlas onboarding. We never did a formal written warning - can we go straight to a PIP? If it's 60 days that lands early Jan, which still lines up with teh Q1 plan.

Trevor, not loving the timing. Isn't she the one who just went to HR? Let me talk to Marisol before we do anything. Also please don't put comp/bonus stuff like that in email.

Subject: DS team restructure - Q1 headcount

Hi Pri,

Ahead of Q1 planning I want to propose restructuring the DS team:

1) fold the Senior DS (Ledgerline) role into Kevin's - he's lead on Atlas and Ledgerline is mostly maintenance now
2) use the freed headcount for an ML Ops engineer req (Atlas needs it badly)
3) Mei-Lin picks up the finance-customer analyses

Practically this means Daniela's role goes away. She's great on the old stack but honestly I don't see her retooling for Atlas at this stage of her career, and we need people who can move fast. Budget side: if it lands in Q1 before the March payout it also frees her 2024 bonus accrual (~$27k at target) and the ML Ops req comes in roughly cost-neutral.

Can we discuss at our 1:1 Thurs? I'd like to have it in the Q1 headcount plan by 11/15.

Thanks
T
